The doctors and staff would like to welcome you to our office. As our patient, we would like to make your visit as comfortable as possible.

We have designed this brochure to answer some of the questions you may have. If you have others, or would like a more detailed explanation, please ask us.

Dr. Charles L. Berman received his D.D.S. from New York University and completed his post-graduate training at Columbia University. He has been a Diplomate of the American Board of Periodontology since 1958 and has been honored by Omicron Kappa Upsilon. He is Clinical Professor of Periodontics and Implant Dentistry at Temple University and the State University of New York at Stony Brook. He has also taught at Columbia University, New York University, and Fairleigh Dickinson University. He is a consultant to the State of New Jersey and formerly to the National Institutes of Health.

Dr. Berman is founder and Past President of the Academy of Osseointegration. He has edited a book on osseointegration for Dental Clinics of North American and is the Editor of the Osseointegration Foundation. He has gained an international reputation as an expert in the field of periodontics and osseointegration (dental implants). Specialty License #2102

Dr. Robert A. Jaffin received his D.M.D. from the University of Pennsylvania School of Dental Medicine and completed his post-graduate training at Columbia University. He is a Diplomate of the American Board of Periodontology. He is a highly regarded surgical specialist in the area of periodontics and osseointegration (dental implants). Dr. Jaffin has lectured both nationally and internationally, including the University of

Pennsylvania, Columbia University, New York University, and Temple University. Over the years, Dr. Jaffin has published many articles as well as developed new techniques. Through his efforts, many patients have substantially improved their quality of life, and Dr. Jaffin continues to dedicate his practice to this end. Specialty License #2089, C.S. #007

Dr. Akshay Kumar received his D.M.D. from Tufts University School of Dental Medicine and completed his post-graduate training at Temple University. He is a Diplomate of the American Academy of Periodontology and an active member of the Academy of Osseointegration. He is a highly regarded surgical specialist in the area of periodontics and osseointegration (dental implants) with advanced training in bone regeneration. In addition to being in private practice, Dr. Kumar has lectured both nationally and internationally and teaches periodontics and implants at Hackensack University Medical Center. Specialty License #3928

Dental Implants

The doctors are highly regarded surgical specialists in osseointegration (dental implants) and were the first practice in New Jersey to use the Swedish Branemark system. Dental implants are an affordable, proven method of tooth replacement that look, feel and function like natural teeth. The doctors have extensive experience, having placed over 7,000 dental implants.

Diseases Of The Periodontium

These diseases destroy the bone structure around the teeth, leading to tooth loss and other dental problems. The treatment involves either non-surgical and/or surgical therapy that can be delivered in one or more

visits, depending on the extent of the surgery and the patient's preference. Upon completion of the treatment, the patient is instructed on how to continue maintenance care at home.

Treatment Planning

We are dedicated to making our patients' treatment as comfortable and convenient as possible. Many hours of careful planning of your case in consultation with your dentists leads to successful results. Our goal is to return you to your dentist quickly, so you may complete your restorative treatment.

Conscious Sedation

Conscious intravenous sedation can be used so that you will be relaxed during the surgical procedure. The medication is administered by an IV in the arm and allows you to remain calm and restful. By eliminating anxiety, the procedure can be completed with the best possible results.

Appointments

Our office will make every effort to accommodate you. Appointments are available Monday, Tuesday, Thursday, and Friday, including Monday evenings until 7:00 P.M.

Financial Policy

Payment is due when treatment is rendered unless other arrangements have been made with our Office Manager.
